

Yashwant Jichkar

📞 91 9529076032 ✉ jichkaryashwant@gmail.com 📍 Pune, India 🌐 GitHub 🔗 LinkedIn

IT graduate with hands-on experience in financial reporting automation, data validation, and KPI analytics using SQL, Python, and Power BI. Experienced in building ETL pipelines, automating reporting workflows, and transforming large datasets to support business decision-making. Familiar with GenAI tools (ChatGPT, Custom GPTs), data visualization platforms, and SDLC practices. Strong interest in external financial reporting, process transformation, and regulatory data workflows in a multinational finance environment.

EDUCATION

Savitribai Phule Pune University	Pune, Maharashtra
Bachelor of Engineering in Information Technology	October 2022- May 2026

SKILLS SUMMARY

Technical Skills: PostgreSQL (Joins, CTEs, Window Functions, Aggregations), Python (Pandas, NumPy)

Data Analytics & Visualization: Power BI (DAX, Power Query, Data Modeling), Tableau, Excel (Pivot Tables, VLOOKUP, Power Query)

Automation & Data Engineering: ETL Pipelines, Reporting Automation, Data Validation, Data Transformation, Workflow Optimization, Data Warehousing ,SDLC

Cloud & Platforms: AWS (S3, Athena, Glue), Oracle Analytics Cloud

Tools & Technologies: Git, Microsoft Office 365 (Excel, SharePoint), ChatGPT, Prompt Engineering, Custom GPTs

INTERNSHIP

Digitize Matrix

Business Analyst Intern

January 2025- June 2025

- Automated manual reporting workflows using Python scripts, reducing operational effort by 40% and improving reporting efficiency.
- Performed data validation and preprocessing to maintain data accuracy, consistency, and audit-ready reporting datasets.
- Documented business requirements, reporting logic, and workflow processes for dashboard and reporting solutions.
- Analyzed operational datasets and KPI trends to support business decision-making and reporting activities.
- Assisted in transforming structured and unstructured datasets for reporting, analysis, and business insights generation.
- Collaborated with cross-functional teams to gather, validate, and organize business data for reporting purposes.

PROJECTS

Financial Planning & Analysis (FP&A) Dashboard | Power BI, SQL

- Developed an end-to-end FP&A reporting dashboard using Power BI and SQL to monitor revenue, expenses, profitability, and cash flow trends.
- Built DAX measures and financial data models to support budgeting, forecasting, and variance analysis.
- Transformed, validated, and integrated financial datasets to improve reporting accuracy and consistency.
- Performed financial variance analysis to identify cost trends, profitability patterns, and business performance insights.
- Automated KPI reporting and dashboard refresh processes to improve reporting efficiency and reduce manual effort.

Credit Card Transaction Analytics & Fraud Insights Dashboard (Power BI)

- Processed and analyzed 1.8M+ transaction records using Python and Power BI to identify anomalous transaction patterns and fraud indicators.
- Transformed and preprocessed transaction datasets using Python and Alteryx to improve reporting reliability and KPI analysis.
- Designed interactive Power BI dashboards with DAX-driven metrics, drill-down analysis, and dynamic filtering capabilities.
- Validated dashboard outputs and KPI calculations to ensure reporting consistency before stakeholder reporting.
- Detected anomalies and unusual transaction patterns to identify potential risks and improve data reliability.

Customer Campaign Performance Analytics Dashboard | SQL, Python, Power BI

- Cleaned and transformed datasets using SQL and Python, ensuring data quality, consistency, and readiness for KPI tracking
- Developed an interactive Power BI dashboard to monitor campaign performance metrics such as conversion rates, customer response, and marketing effectiveness.
- Conducted in-depth analysis to identify trends, segment customers, and generate actionable insights to optimize campaign performance.
- Maintained clear documentation of data preparation steps, reporting logic, and analytical findings.

CERTIFICATIONS

- Microsoft Certified: Fabric Analytics Engineer Associate (DP-600)
- Oracle Analytics Cloud 2025 Professional 1Z0-1041-25
- Relevant Coursework:** Database Management Systems, Data Warehousing & Mining, Software Engineering, Business Intelligence, Financial Accounting Fundamentals, Business Finance & Economics
